

FLASHCONFERENCE

FLASHCONFERENCE

8th flashconference
May 05 – 06, 2006
Stuttgart
www.flashconference.de

This year's fmx and **flashconference** closed on Saturday May 06 with about **5.000 visitors** from all over the world (30% of the visitors came from outside Germany). This strengthens the **international profile** of the conference and the switch to English as conference language was a consequent step to the international level.

The **fmx showcases** presentations, workshops, screenings and best known films like this years' **Oscar Winners**.

On the **flashconference**, 18 presentations and workshops were scheduled and more than **800 visitors** saw **flash insights**, **business applications**, sound, **flash video** technologies, **actionsript** programming, 3D implementation, **film production**, realtime concepts and much more!

One of the most outstanding factors of the **flashconference** is: it's **part of the fmx!**

And it had a **lively atmosphere**:

Colleagues gave each other a hearty **welcome** - because **it's good to meet in Stuttgart!** Professionals contacted **producers** and self-assured **newcomers** made their first contacts.

For **about 5000 filmmakers**, industry **experts**, media representatives, **programmers**, and artists, the **fmx 2007** is again a sure mark in their calendar: it will take place **May 02 – 05, 2007**.
